SUBJECT INDEX

Alkali metal salts
The solubilities of the alkali metal salts and the precipitation of Cs^+ from aqueous solution 27

Axial coordination
Axial coordination of azaferrocene to transition metal macrocyclic complexes: photoactivation of the macrocycle 169

Azaferrocene
Axial coordination of azaferrocene to transition metal macrocyclic complexes: photoactivation of the macrocycle 169

Carbon dioxide
Reactivities of carbonyl sulfide (COS), carbon disulfide (CS_2) and carbon dioxide (CO_2) with transition metal complexes 37

Carbon disulfide
Reactivities of carbonyl sulfide (COS), carbon disulfide (CS_2) and carbon dioxide (CO_2) with transition metal complexes 37

Carbonyl sulfide
Reactivities of carbonyl sulfide (COS), carbon disulfide (CS_2) and carbon dioxide (CO_2) with transition metal complexes 37

Catalytic asymmetric oxidations
Catalytic asymmetric oxidations using optically active (salen)manganese(III) complexes as catalysts 189

Copper(II) complexes
Bonding properties of thiocyanate groups in copper(II) and copper(I) complexes 115

Copper(I) complexes
Bonding properties of thiocyanate groups in copper(II) and copper(I) complexes 115

Creatine
Coordination properties of the bioligands creatinine and creatine in various reaction media 1

Creatinine
Coordination properties of the bioligands creatinine and creatine in various reaction media 1

Macrocycles
Axial coordination of azaferrocene to transition metal macrocyclic complexes: photoactivation of the macrocycle 169

Photoactivation
Axial coordination of azaferrocene to transition metal macrocyclic complexes: photoactivation of the macrocycle 169

Porphyrins
Recent developments in the chemistry of early transition metal porphyrin compounds 137

(Salen)manganese(III) complexes
Catalytic asymmetric oxidations using optically active (salen)manganese(III) complexes as catalysts 189

Thiocyanate groups
Bonding properties of thiocyanate groups in copper(II) and copper(I) complexes 115
